NURSE CHALLENGES IN IMPLEMENTING GOOD PROCESSING PRACTICES IN THE MATERIAL AND STERILIZATION CENTER: PATIENT SAFETY

Maria José do Nascimento Silva, Samara Bianca Silva da Silva, Silvana Silva de Souza, Eliane da Costa Lobato da Silva, Ana Patrícia Gomes Vasconcelos

OBJECTIVE

Identify the challenges faced by the CME nurse in the processing of articles regarding surgical patient safety

METHODOLOGY

Descriptive, exploratory, qualitative research.
Population: CME nurses
Location: Belém do Pará Public Hospital - Brazil
CAEE 96056918.3.0000.5512

RESULTS

✓ Inadequate physical structure;
✓ Insufficient human resources;
✓ Equipment without maintenance,
✓ Absence of protocols,
✓ Lack of professional training

CONCLUSION

Understanding the Difficulties, which is the first step towards culture change in relation to Good Healthcare Product Processing Practices
